To the Hiring Manager,

I'm Arman Shikalgar, a final-year student pursuing a B. Tech in Artificial Intelligence and Data Science. I'm writing to convey my interest in an opportunity that would enable me to use my knowledge of Python development, data analytics and frontend technologies.

I've performed tasks remotely, built actual tasks, and written clean code during my virtual internships in web development and Python over the past year. I recently finished two personal projects of which I'm quite proud:

A Streamlit-based application called PDF Chat Bot allows users to interact with uploaded PDF files via Hugging Face and LangChain.

[Preview](#)

A MongoDB-powered application for managing and organizing movie records with complete CRUD functions is the Movies Manager App.

[Preview](#)

I take pleasure in acquiring, developing, and spreading knowledge.

Best regards,

Arman Shikalgar
